**ERP Project (C# , ASP.net, HTML, CSS)**

- Logic development and coding for the Merchandising section of the ERP.

**e-VAT Project (C# , ASP.net, MVC Framework, HTML, CSS)**

- UI, logic development, coding, generating VAT reports and conducting performance testing.

## PROJECTS

### Sports Camp

[Live Site](#) | [GitHub \(Client-Server\)](#)

**Overview:** Sports Camp is a MERN based e-commerce site where users can book any sports class through a secure payment system (STRIPE) and get enrolled.

**Technologies:** React JS , MongoDB ,FireBase, JWT, Node JS, Material Tailwind

**Features:**

1. Role-based access control for Admin, Instructors and Users to define permission and showcased class offerings and instructor summary..
2. Implemented user registration, authentication, and authorization with JWT verification to access class booking, payment tracking and enrollment.
3. Developed Instructor dashboard for class management(add/update).
4. Admin dashboard for user management,role sharing and class approval.

### The Toy Shop

[Live Site](#) | [GitHub \(Client-Server\)](#)

**Overview:** A marketplace of toy cars based on MERN with toy details where authorized sellers have permission to add/update their toy collection in the marketplace.

**Technologies:** React JS, MongoDB, FireBase, Express JS, Daisy UI

**Features:**

1. Provided an intuitive interface for registered sellers to add, update/delete toys.
2. Clicking VIEW DETAILS on any toy will lead to toy details projected in a tabular form with price , ratings , seller information and search functionality.
3. Integrated additional components such as a categorized toy selection, informative blogs and newsletters to offer users an engaging platform.

### FindMyChef

[Live Site](#) | [GitHub \(Client-Server\)](#)

**Overview:** A Chinese recipe viewer site based on React that showcases a selection of chefs and their work details, allowing users to explore their profiles and achievements with a click.

**Technologies:** React JS, Node JS, FireBase authentication, Express JS, Daisy UI

**Features:**

1. Utilized a JSON file to store data and offered Firebase authentication for registered members to access detailed chef recipes.
2. Registered users can show love to any recipe. Additional sections like blogs and about us were added for all users.

## TECHNICAL SKILLS

**Expertise:** React.js , HTML5, CSS3, Tailwind, Bootstrap, DaisyUI, MaterialUI

**Comfortable:** JavaScript, Firebase, MongoDB, Redux, Typescript

**Familiar:** Node.js , Express.js. , MySQL, NextJS, Axios , JWT , Stripe

**Tools:** Git, Figma, Netlify, Vercel, Chrome Dev Tools, Surge

## INTERPERSONAL

- ★ Team Collaboration
- ★ Problem Solver
- ★ Time Management
- ★ Self-Learner

## EDUCATION

B.Sc. in Computer Science & Engg.

Bangladesh University of Professionals

## PROFESSIONAL COURSE

Complete Web Development  
Programming Hero  
Jan 2023 - June 2023

## LANGUAGES

**English** - Proficient

**Bengali** - Native
